

22nd March 2019

Press Release n. 23

THE FIM EUROPE MANAGEMENT COUNCIL MEETING IN FIUMICINO

The FIM Europe Management Council meeting took place on Wednesday 20th March in Fiumicino (Rome), after the Internal Audit held on the previous day at the General Secretariat.

The Acting President Mr Martin de Graaff dealt with the Management Council several sporting and beyond sport issues, the organisation of the coming Congress in Zagreb and presented the 2018 balance sheet and the 2019 budget to be approved by the next General Assembly.

From left to right: Rodolfo Romeo, Tapio Nevala, Laurent Delbroek, Jean-Marc Desnues, Silvia Monatti, Juhani Halme, Martin de Graaff, Alessandro Sambuco, Michal Sikora, Nicoleta Melania Olariu, Martins Lazdovskis, Silvio Manicardi.

Mr Martin de Graaff, Acting President

“The day before the Management Council the two Deputy Presidents and the Secretary General discussed with the Press Officer the style of the press releases and newsletters. We should use the press contacts of the federations for more contacts in FIM Europe. The presentation of the format and content of the FIM Europe Magazine was interesting and will be completed soon. The Management Council has prepared the coming season and the congress in Zagreb in July. After the meetings of the Beyond Sporting Commissions in January some good proposals were discussed, all decisions are taken unanimously. The next meeting of the Management Council will take place during the congress on Friday and Sunday”.

Alessandro Sambuco, Secretary General

“Also this year I cannot be that happy about the positive results of the 2018 Balance Sheet and the favourable report of the Internal Auditors for the transparency and clarity of the FIM Europe bookkeeping. Although we have been fortunate to note favourable judgments in the last years, we do not want to rest on our laurel, but rather continue to operate prudently with the utmost transparency. In this regard I would like to underline that the performances of the Financial & Accounting Department are the result of a serious work ethic and a constant research in improving the processing”.
