

22nd July 2021

Press Release n. 61

EMX Quad Championship

FIM Europe is pleased to announce that, with full cooperation of the FIM and APO Multimedia, the 2021 EMX Quad championship will consist of 3 point scoring races at each event when combined with the FIM Sidecarcross World championship. One race will take place on Saturday which will replace the Qualification race and two races will take place on Sunday, with all 3 races being 25 minutes plus 2 laps. This has been agreed due to the small number of events because of the Covid pandemic restrictions imposed on organisers.

This will also apply to the stand alone event at Mladina in Croatia.

Therefore the quad riders will have more point scoring races for the overall championship classification, as will the sidecar competitors.

Starting order for the three races will be determined by the timed practise session of 25 minutes. Normal points will be awarded for each race and the overall winner of the event will be the rider who has obtained the most number of points irrespective of the number of races they finished. If a tie exists, the points scored in race 3 will determine the order of placing in the final standings of the event of those riders who scored points.

The winner of the championship is the rider who has obtained the most points from all the races of the EMX Quad championship irrespective of the number of races competed in.
