

17th February 2023

Press Release n. 10

Stock™ European Championship will run in a separate class in 2023

Following to the high number of applications from prospective competitors in the Moto2™ European Championship, the Finetwork FIM JuniorGP™ World Championship has therefore decided to run the **Stock™ European Championship** as a separate class in 2023.

This new Championship will comprise seven races, one per event, and use a single tyre manufacturer. As a new category, the **Stock™ ECh** will create a great opportunity for the grid to showcase their skills, taking their own race wins and podiums.

Between the 15th of February and the 15th of March, applicants whose place on the grid has already been confirmed will be able to formalise their application and assure their place on future Entry Lists.

With the birth of the **Stock™ ECh**, there will now be three European categories in the Championship: **Moto2™ ECh**, **ETC** and **Stock™ ECh**.

Please visit the FIM Europe website and www.fimjuniorgp.com for further information and updates.
